Skills

Web-Development React Firebase Flask
Bootstrap Data Analysis using python
Data Acquisition Data Structures
Algorithm Design & Analysis Problem Solving
Statistics MS-Excel Git Unix

Experience

CS OUTREACH INTERN

Def Hacks

Worked with a team to develop Computer Science platform for underrepresented youth in the field of CS using React and firebase.

Oct, 2020

The Wire Us Challenge

Created 50 webscraping challenges for "The Wire Us Challenge 2020" by IGDТУW. Implemented python libraries like Scrapy, bs4 and Selenium in creating real-world problems. Used Rest APIs and various techniques in extracting data efficiently from websites.

Aug, 2020

Personal Projects

- Burger Builder App** (React)
A food ordering application built with React and deployed on firebase. Implemented CRUD operations and concepts like Lifecycle hooks, Routing, AJAX using Axios, etc.
- Bookmarking App** (Vanilla Javascript)
Built a simple Bookmarking app using Javascript, HTML and CSS.
Learned integrating OpenGraph api for fetching data and Web storage api for storing data.
- Bomb Extension** (Vanilla Javascript)
A chrome extension to prank your friends.
Built with vanilla javascript.

Personal Details

DOB - 07-12-1999
